

Swing-A-Way Lifters

Unique Design Saves Time and Reduces Worker Injuries

*Patent Pending

Innovative. Economical. Efficient.

The Swing-A-Way Lifter* from Bayne Premium Lift Systems was specifically designed to save time, reduce costs, and protect workers from back and other injuries associated with heavy lifting.

To minimize weight and bag breakage, many companies are switching to smaller cans or heavier mil bags to manage their trash needs. Smaller cans mean employees must take out the trash more frequently, preventing them from serving customers and performing other value-added duties. Heavier mil trash bags are more costly than lighter mil bags, literally result in throwing money away.

The unique design of the Swing-A-Way Lifter makes it an ideal solution for any commercial or industrial application that uses 6- and 8-yd front-loading containers and loading docks. Swing-A-Way Lifters can lift up to 500 lbs., require little space to operate, and can fit most locations with ease.

Technical Specifications

- Lifts up to 500 lbs.
- Easy to use
- 15-second cycle time
- Electrical: 110-volt 15 amp or 230/460-volt 30 amp
- Available solar option provides an environmentally friendly solution for outdoor applications
- OSHA compliant
- Uses food grade hydraulic oil

Benefits

- Reduce employee injuries related to heavy lifting
- Fewer employees needed to take out the trash
- Minimize worker's compensation costs
- Use lighter mil, lower cost trash bags
- Easily lift bags and cans too heavy to lift manually
- Can be used indoors or outdoors

Applications

- Restaurants and Cafeterias
- Apartment and Condominium Complexes
- Grocery Stores
- Schools and Universities
- Theme Parks
- Municipalities
- Retirement Communities

Industries

- Auto Parts
- Food Service
- Medical
- Pharmaceutical
- Produce
- Recycling
- Shredding
